

# Help **Nalini** Now

## VOLUNTEER WITH US!

Just a few days after Thanksgiving, our dear friend **Nalini Ambady was diagnosed with leukemia.**

Now she requires a bone marrow transplant, and she needs your help! You could be the lifesaving match for Nalini, or someone else battling leukemia. It only takes a few minutes and a simple cheek swab to find out.

**You have the power to save a life.**  
**Please help.**

Dr. Nalini Ambady is a Stanford University professor, nationally-recognized scientist, Palo Alto resident, and mother of two teenage daughters. She has mentored and inspired countless students. Now she needs our help.

We are looking for local high school students to help staff bone marrow donor registration drives

No experience necessary! We'll train you on-site.

Learn more and see a list of upcoming drives at

What does volunteering involve?

- flyering in the area and encouraging people to come check it out
- helping people fill out paperwork
- helping with the cheek swabbing

Ready to volunteer?
